(54) MOBILE PHONE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a mobile phone to which various operating modes can be set depending on a schedule.

SOLUTION: The mobile phone is provided with a schedule function section 31 that can assign time by each desired schedule item and designates a desired operating mode among different operating modes by each schedule item, a clock function section 33 that generates real time data, and an operating mode function section 32 that shifts to an operating mode designated by a corresponding schedule item when a current time obtained by the real time data corresponds to a setting time of any schedule item of the schedule generated by the schedule function section 31.
